

Please do not let the LPFM take priority over translator FM. If this goes into effect I could lose my ability to listen to K-love and like radio stations. I listen to K-love everyday and it gives me a decent commercial free radio alternative. It provides a moral, encouraging and beneficial option to the community. The public would be losing a radio station where parents would not have to worry what their children were listening to and that families can enjoy together. Taking away clean, moral, family oriented radio programming is NOT the direction that this country needs to go in.
